THURSDAY EVENING, MARCH 19, 1903.

To Judge a River's Breadth. It is necessary to make use only of the eyes and the brim of a hat to measure the width of any ordinary stream or even of a good sized river, and here is the way to do it:

Select a part of the river bank where the grounds run back level and, standing at the water's edge, fix your eyes on the opposite bank. Now, move your hat down over your brow until the edge of the brim is exactly on a line with the water line on the other side. This will give you a visual angle that may be used on any level surface, and if, as has been suggested, the ground on your side of the river be flat you may "lay off" a corresponding distance on it. To do this you have only to hold your head perfectly steady, after getting the angle with your hat brim, supporting your chin with your hand, if necessary, and turn slowly around until your back is toward the river. Now, take careful note of where your hat brim cuts the level surface of the ground as you look over the latter, and from where you stand to that point will be the width of the river, a distance that may readily be measured by stepping. If you are careful in all these details, you can come within a few feet of the river's width.—Detroit Free Press.

Her Latest Break. "My six-year-old girl is an awful chatterbox," said a broker, "and the worst of it is that when we have guests at the bouse she is continually making breaks of the worst sort-breaks that tend to rattle the dry bones of the famfly skeleton in the closet. Recently when we had company at dinner she allowed her tongue to run away with her, as usual, the result of which was that she very much embarrassed both her father and mother, although the guests, I am free to say, seemed de-lighted. I had a very serious talk with her and impressed upon her, or tried to, that she must not tell any family se-cret. The next time we had company she was permitted to come to the table only by promising that she wouldn't ut-ter a word. She behaved beautifully and had nothing to say until the des-sert was about to be taken away. Then her lips began to quiver, and finally she burst into tears. 'Why, what's the matter, darling? her mother asked. want some more ice cream, if that isn't a family secret! she wailed between sobs."—Philadelphia Record.

The popular belief that the oyster is a most nutritious article of diet does not rest upon any scientific basis. The oyster as a food could not satisfy the demands of the human body. While the oyster, when not stewed, is very palatable, wholesome and easily assimilated by weak, impaired stomachs, it cannot be contended for a moment that it contains such elements and nutrition as may be found in beans, rice or potatoes. There is very little, if any, fatmaking or muscle building material in the oyster. Its composition is largely nitrogous, and, being rich in phosphates, it is generally regarded as an excellent food for the brain, but a man reduced to an exclusive diet of oysters would soon find himself deficient in adipose tissue and in those elements that go to make up physical force and vitality in

the human body.

A firm which was sued in an Euglish court for the price of a sign defended the case on the ground that the "o" in their name was smaller than the other letters. It was proved by measurement, however, that it was a sixteenth of an inch larger, allowance having been made for the fact that, owing to an optical illusion, the letter "o" always looks smaller than the eighboring letters. Judgment was given for the signmakers.

But They Use Them.

The danger of carrying an argumen to its logical conclusion is thus set forth by the Chicago Post: They were at a picnic. "Fingers were made be fore forks," she laughed as she helped herself in democratic fashion. "Yes," he admitted, "and people were made before clothes." She hastly reached

"I caught a bad cold. For about 3 years and this fall especially I was troubled very badly with it, and nothing would give me relief. I coughed-up phlegm and continued to do so right along. Finally a friend advised me to try a bottle of Dr. Bull's Cough Syrup. I did not have much faith in it at first, however, when I took the fourth dose, I began to mend, and within a short time, considering the seriousness of my case, I was entirely cured by this marvelous remedy. I shall never be without a bottle in the house hereafter, as it was the means of saving my life. It is worth its weight in gold."
